

4-6-8 FOOT LENGTHS / 430 MA. 800 MA

CROSS SECTIONS

Ideal For Large Retail Stores

- Directs 50% more light down into the merchandising zone
- Reduces high-angle direct glare by over 50%
- Clean, unobstructed ceiling plane
- Uniform, low-brightness illumination
- Fewer fixtures required – saves energy and maintenance costs

CONSTRUCTION: Heavy gauge cold rolled steel housing, die-formed for uniformity and accuracy; spotwelded for structural rigidity.

FINISH: Reflector and Housing, 350° F. baked white enamel - 88% reflection factor on reflecting surfaces.

MOUNTING: Designed for recessed ceiling mounting in Exposed 'T' Grid ceiling systems, units may be mounted individually or in continuous rows. Abundant knockouts throughout housing and endplates make units adaptable for all methods of installation. Optional mounting accessories such as Leveling Lugs are available.

WIRING: Completely wired with approved ballasts and lamp sockets ready for 110-125 volt A.C. installation. Lamps not included.
